EDUCATION

Stony Brook University <i>Master of Science in Computer Science</i> GPA: 3.83/4.0	Stony Brook, NY Expected May 2026
Stony Brook University <i>Bachelor of Science in Computer Science (Second Major: Applied Mathematics)</i> GPA: 3.83/4.0	Stony Brook, NY May 2025

EXPERIENCE

Software Developer <i>HavenSmart LLC</i> - Automated data syncing in NetSuite by developing SuiteScript (JavaScript) workflows and RESTlets, reducing manual processing time by 60% and saving 10+ hours of weekly work. - Optimized the data connector between NetSuite and D-Tools through Celigo integrator.io cross-platform integrations, improving data accuracy by 75% and reducing sync errors.	May 2025 – Present New York City, NY
Backend Developer <i>Ding Carpool</i> - Built and optimized 25+ API endpoints and database models with Node.js, Express, and MongoDB, improving response consistency by 30%. - Implemented authentication, ride matching, and real-time notifications with Socket.io, boosting beta user engagement by 25%.	Dec. 2024 – May 2025 Malibu, CA
Lead Technologist <i>SBU Division of Information Technology</i> - Resolved 500+ Brightspace LMS and platform issues, improving uptime by 75% for 15,000+ students. - Facilitated 20+ webinars for 30+ participants using Zoom and Brightspace, doubling platform adoption and reducing support tickets by 50% through targeted IT training.	Jan. 2022 – May 2025 Stony Brook, NY
Data Engineering Intern <i>GreenTree Capital</i> - Built 15+ automated workflows with Power Automate and Power BI, cutting manual processing time by 40%. - Optimized recruitment workflows using SQL, boosting production by 25%.	Nov. 2024 – Apr. 2025 New York City, NY
AI Software Developer <i>Mavn AI</i> - Solved 100+ complex AI prompt challenges for ChatGPT and Bard, boosting response accuracy by 15%. - Led code reviews and QA across Ruby, Bash, Python, and C#, reducing defects by 30%.	Jul. 2024 – Dec. 2024 New York City, NY

PROJECTS

Palette-Guided Image Colorization <i>Python, PyTorch, CNN, CIFAR-10</i> - Built a machine learning convolutional encoder-decoder model to colorize grayscale images using user-defined palettes, achieving SSIM of 0.94 and LPIPS of 0.18. - Reduced reconstruction error by 33% through CIFAR-10 upsampling and MSE loss optimization. - Delivered reproducible, perceptually accurate results with controllable palette-guided colorization.	Jan. 2025 – May. 2025
QueryHub – Q&A Forum <i>MongoDB, Express, React, Node.js, BCrypt, Cookie-Parser</i> - Built a full-stack Q&A web application enabling 50+ beta users to exchange 200+ questions and answers, using the MERN stack for seamless data flow and real-time interaction. - Implemented secure authentication with BCrypt and session management via Cookie-Parser, protecting 100% of user accounts during testing.	Aug. 2024 – Dec. 2024

SKILLS

Programming Languages: Java, Python, C/C++, SQL (MySQL, Postgres), JavaScript, HTML/CSS, R, MERN
Frameworks & Libraries: React, Node.js, Flask, FastAPI, JUnit, Material-UI, Pandas, NumPy, Matplotlib
Developer & Data Tools: Git/GitHub, Docker, Google Cloud Platform, AWS, Azure, Tableau, Power BI, Salesforce CRM & Analytics, VS Code, IntelliJ, PyCharm, Visual Studio, Eclipse, CI/CD Pipelines, Linux Administration
Relevant Coursework: Distributed Systems, Numerical Analysis, Discrete Math, Computer Security
